

Get it right the **first time**

Anyone who has ever submitted an XML EDR to EPA knows it has to be done right, the first time. At ESC, we back you all the way with our premier CEMS compliance software, ESC|StackVision.

StackVision was designed especially to meet the ever-changing needs of the electric power industry. StackVision's user-driven, innovative design keeps you informed on emissions data in a user-friendly, real-time console of tools and displays. With advanced features such as DataLab, CEMScope, ProcessNow, Linearity Tool, Data Management Tool and support for LME units, StackVision provides you with the tools necessary to meet all reporting process requirements mandated by EPA and state agencies.

Over forty percent of all electric utilities and sixty percent of all coal-fired electric utilities rely on ESC to meet their stack emissions monitoring compliance needs. With nearly forty years of experience, ESC is committed to keeping electric power professionals up-to-date with the latest in compliance software.

Put your confidence in the leading team in CEMS DAS software. Let ESC get it *right* for you.

Environmental Systems Corporation

Tomorrow's Technology Ready to Work Today

StackVision is full of innovative, intuitive features and tools designed with your needs in mind!

User-Friendly Real-Time Console Tools & Displays

- Stay informed of emissions data and data quality indication
- Graphical trending creates a visual perspective for historical data

DataLab

- Review, evaluate and diagnose emissions data
- Export files in Microsoft® Excel or Adobe® PDF formats
- User-configured custom filtering and historical charting

CEMScope

- Relational views of parameters and their properties
- Acts as a hub for user controls and troubleshooting tools
- Access data controllers and set calibrations from one multi-functional screen

Utilizes Microsoft® SQL Database Tools

- Employs industry reporting standard, Microsoft® Reporting Services
- Schedule the emailing of reports
- Present data in diverse ways through custom reports

Automated Processing of Regulatory Data ("ProcessNow")

- Save time and decrease the risk of error

End User Configuration Tool

- Modify parameter-related information

Linearity Tool

- Designed to provide a more user-friendly experience allowing easier navigation and improved performance
- Significant time reduction in new test entry
- Additional regulatory support, including Abbreviated Linearity Tests

Data Management Tool

- Manage data backup process with ease
- Customizable data backup and compression features allow users to choose what data is saved, where it is stored and for what amount of time while maximizing available hard drive space

...And much more!

Contact the ESC Account Executive Team today and see why StackVision is the most trusted CEMS software product on the market!
