

## TES Instrumentation Service and Calibration

Thomson Environmental Systems (TES) have been supplying Air Quality and Process Control Instrumentation to the Australian and New Zealand market for over 12 years. TES invest heavily in providing high quality after sales technical support and service. TES employ dedicated service technicians and design engineers giving us the ability to support a wide range of Stack and Ambient products including Dust, Gas, Meteorological and Flow monitors. We offer a wide range of services – instrumentation calibration, annual service, repair, ongoing maintenance and training programs all of which can be conducted at our facility or at your site. Read on to find out how we may assist with supporting your monitoring network.

### CALIBRATION EQUIPMENT

Save time and expenses on maintaining calibration equipment.

We maintain certified standards for calibration of:

- Flow – dust and gas instrumentation
- Ozone – generators in NO<sub>x</sub>, Ozone analysers and transfer standards
- Gas Analysers – NO<sub>x</sub>, CO, SO<sub>2</sub>, H<sub>2</sub>S, O<sub>3</sub> and more,
- Dust Monitors – FH62 calibration foils
- Gasmeter Multi-Gas Analysers

We can also calibrate your Gas Analyser Calibrators and BIOS Flow calibrators.

### INSTRUMENTATION ANNUAL SERVICE AND REPAIR

With many years of hands on experience our technicians provide you and your instrumentation with expert knowledge for a quick and effective annual service or repair – or opt for annual maintenance contract and minimise instrument downtime and data loss.

Both our Sydney and Perth offices stock an extensive range of parts and consumables. Service response is offered quickly and efficiently to ensure **maximum uptime** of the analysers with **Excellent Value** to our clients.

**Quantity and Contract Discounts Available**

**TES do offer Loaner equipment** that can be shipped to you to use while your instrument is being serviced and/or calibrated. This is an ideal way to minimise down time and data loss. Instrument Loans are subject to availability.

## TES Instrumentation Service and Calibration

### ONSITE ASSISTANCE

Are you installing a new station, upgrading existing equipment or suffering staff shortages and need a hand with your Ambient Monitoring Equipment, Continuous Emissions Monitoring Equipment or Process Control Instrumentation?

TES can provide personnel and equipment to assist with:

- Installation,
- Commissioning,
- Configuration,
- Calibration,
- Services and repairs.

Technical Officer, Tracy, calibrating a portable gas monitoring system at a mine site in West Africa.

Technical Engineer, Aymeric, provides expert training on the Gaset multi-gas analyser to new users

### TRAINING

#### Training is a very powerful tool!

By ensuring you and your employees are confident in: operating, maintaining and trouble shooting instrumentation you can:

- Minimise instrument downtime,
- Maximize data capture,
- Prevent costly accidents damaging instrumentation,
- Maintain a monitoring network that performs seamlessly

Our factory trained personnel provide theory and hands on instrumentation training for a wide range of equipment. Courses can be conducted at your facility or ours and can be tailored to suit your specific requirements.
